

Sovereign
bespoke

Thanks to our increasingly popular bespoke trolley design service, and extensive experience, we can create a custom trolley to meet your exact requirements, whatever its application.

As specialists in the design, manufacture and maintenance of all types of trolley, the Sovereign team are experienced at creating bespoke trolleys for a variety of sectors. Our experts have designed and manufactured front-of-house trolleys for the leisure and hospitality industries, PCB assembly trolleys for the electronics industry, and integrated trolley and water urns for the rail industry.

Whether you need just one trolley or a whole fleet, we undertake a complete design and development consultation, providing you with our expert advice to guide you through the process.

Concept

- Rigorous research and development of client operations and application
- Analysis of the trolley's environment, including understanding the flooring to ensure stability and manoeuvrability
- Detailed technical CAD drawing of the design

Testing & assessment

- Production of a prototype
- In-house testing by our experienced engineers
- On-site assessment to evaluate its suitability to its application

After-sales maintenance

- Maintenance package tailored to suit client requirements
- Instant on-site repairs or off-site maintenance, service and repair from our West Midlands-based Service Centre
- Internal maintenance database to analyse performance, monitor trends and identify fault patterns

In collaboration with you, Sovereign can create an industry-specific tailored trolley that meets your specific requirements, whatever its application.
