hospitalities

Smart companies are tapping into the power of food to encourage employees to be more productive and to support their health and wellbeing.

Taking a break from work helps people feel more energetic, motivated and improves concentration. Employers that provide a mobile catering service are encouraging their employees to get up from their desks, refuel and converse with each other. Providing your staff with easily accessible food and drink prevents them from needing to leave the office at lunchtime. It boosts productivity without taking them out of the building and can provide an additional revenue stream for the company.

The food service trolley has come a long way since the old fashioned 'tea lady' pushing their trolley around the work place. British designed and manufactured, a Sovereign food service trolley is tailored to suit your exact requirements and complement your corporate branding. We work closely with catering managers, head chefs and facilities managers to help you supply a service that adds value and improves wellbeing.

Sovereign designs and manufactures food service trolleys for a wide range of sectors, allowing them to provide their customers with a mobile catering service. Our clients include hospitals, colleges and universities, theatres, exhibition centres, and even a zoo!

In collaboration with the client we create a tailor-made trolley that meets specific requirements to provide an efficient and profitable catering service. Visuals and prototypes are available ahead of manufacture, so you can test your customised trolley and make sure it meets your needs.
