

Sovereign
rail

In the fight to persuade consumers to travel by rail, onboard hospitality and catering services play a key role in enhancing passenger experience.

The role of the rail catering trolley continually changes to embrace greater retail opportunities and more efficient catering services. Sovereign has a strong track record in the design and manufacture of trolleys. Our expert designers and engineers stay ahead of the latest demands with innovative ideas and a solution-focused approach to trolley manufacture. Working in close consultation with the train operator and catering company, our British-made trolleys are designed with customisation in mind. In collaboration with the client we create a tailor-made trolley

that meets specific requirements to provide an efficient and profitable onboard service.

Following rigorous research and development during the design process, where every detail is carefully considered, our fully-trained engineers build a bespoke prototype. This is vigorously tested in-house by our experts and then assessed onboard by the catering team. Feedback is given and any necessary changes are made to make sure it fully meets the project requirements. Sovereign's reputation for reliability and a customer-focused approach, combined with years of specialist expertise, has proven to inspire confidence. We develop long-lasting partnerships with our clients, which includes many of the UK's major train operators and onboard catering companies.

So, what can you expect from a Sovereign rail trolley?

British designed and manufactured

Compact, lightweight and simple to manoeuvre

Able to maintain the temperature of food and drink

High quality material and workmanship providing a reliable and durable cart

Stylish and practical innovations tailored to meet specific requirements

Corporate branding to suit the latest train interiors

Designed to reduce maintenance costs and maximise product awareness
